

# Associative Reasoning Assessment (ARA)

*T.Prousalis-hriqtests.com © February 2026*

**Description** : ARA consists of 32 items (sets of 3 or more, in some cases, words). You have to find the word/concept that connects best with each given set of words. In one item the answer is a name. The answers, once found, are straightforward, without leaving the slightest doubt. Items haven't been set according to difficulty. Number in brackets after each set of words denotes the number of letters of the word to be found.

**Knowledge required** : No specific or deep knowledge on any field is required. The average person has heard many times in their lives of the words given/asked for. However, a sufficient vocabulary range in English is required, so that the testee can think of possible synonyms/antonyms/near-homophones etc., when required.

**Using references** (eg. Searching the web for a term one might not know) is allowed. Do not expect significant help from AI platforms (using them is anyway prohibited for such tests), as items have been checked under various scenarios.

**On sending answers** : Your answers have to be sent to [hriqtests-at-gmail.com](mailto:hriqtests-at-gmail.com)

**Please work alone.** Discussing items and/or their possible solutions, in any way, is strictly prohibited.

Test begins.

- (1) Chess, Metal, Widow (5)
- (2) Idea, Signal, Sphere (5)
- (3) Sweet, Thirst, Toilet (8)
- (4) Color, Name, Picture (4)
- (5) Motion, Planet, Trial (5)
- (6) Floor, Genetics, Pixel (6)
- (7) Carry, Horse, Monkey (6)
- (8) Apple, Join, Paper (7)
- (9) Car, Energy, Fight (7)
- (10) Euler, ID, Sum (4)
